YOU CAN'T BUY A BETTER PAINT FOR LESS!™

## Mould Go

SECTION A:	<b>DESCRIPTION</b> Very affective for coastal areas or areas of constant dampness. A specially formulated water-based fungicidal wash to be used to remove contaminants such as bacteria, mould and algae on bricks, masonry, wood and plastered surfaces prior to painting. This product not only kills surface fungi but also the fungal spores. It is very important the rain must not fall on treated areas during the following 12 to 24 hrs after application.
SECTION B:	<b>COMPOSITION</b> Combination of water diluted alkyl dimethyl ammonium chloride and 2-phenyl-phenol.
SECTION C:	<b>PHYSICAL PROPERTIES</b> Colour: Clear or straw colour Appearance: Transparent S.G.: 0.995 - 1.005 Shelf Live: 12 Months Storage Conditions: Normal Pack Size: 5ℓ, 20ℓ, 200ℓ
SECTION D:	<b>APPLICATION PROPERTIES</b> Method: Brush, Roller or Airless Spray Number of coats: 1 or 2 as required Drying Time: Dries by water evaporation Overcoating Time: Between 16 - 72hrs Cleaning Solvent: Water-based product
APPLICATION E:	<ul style="list-style-type: none"><li>• Spray 'Mold-Go' onto the affected area and allow the product to evaporate until dry.</li><li>• Once the mold has been killed and changes colour from black or green to a brown, remove the dead mold using a stiff bristle brush, stiff cloth or sand paper. If the mold is dense and has not been killed after the first application, repeat the process.</li><li>• Mold-Go' must be applied to dry surfaces for best results. 'Mold-Go' can be used in humid environments but the reaction occurs over a longer period of time.</li><li>• For re-painting bathroom walls and ceilings, and Kitchen walls an ceilings it is recommended that either Excelsior Velvet-Gel non drip enamel (Turps based) or Excelsior Aqua-Satin (Water based) is used. Refer to the instructions for priming and surface preperation details.</li></ul>
SECTION F:	<b>PRECAUTION</b> It is recommended that protective clothing is worn when using the MOULD GO, taking care not to get any product on skin or the eyes. If accidental contact occurs fluth the affected area thoroughly with water. If the product is taken internally contact a physician immediately.  Flash point: Water-based Toxicity: Toxic contains Alkyl dimethyl benyl ammonium chloride
SECTION G:	<b>NOTE</b> No guarantees are implied by the recommendations contained herein; since the data sheet is issued for information only. Method of application, surface cleanliness, conditions of use etc. are beyond our control.
